1. The following priority construction projects have been planned or are under construction in the DDR:
  - a. A training camp for the national army (Vopo) in Terolin (N54/P81).
  - b. A training center for the national naval forces (Seerolizei) in Prora (N55/P76).
  - c. Five training centers for nurses. Locations for the centers have not been designated yet, although construction is to begin in 1952. It is reported that these projected training centers are to be a part of a new organization which will correspond to the Red Cross.
  - d. The Soviet Control Commission reportedly has ordered that all Autobahn bridges, viaducts and bridges on main traffic routes be reinforced to increase their load capacity from 50 to 70 tons. The deadline set for this project allegedly is 31 October 1952. As a camouflage measure the bridge approaches are to bear signs indicating a load capacity of 8 to 15 tons.
